Suggestions for improvements:

- *upload presentations to website*
- *Air-Con far too cold*
- *close to excellent*
- *well organised and good scientific content of talks/sessions*
- *more integration of posters*
- *more space for posters, enhance interactions*
- *Great food, but sound quality was poor, exacerbated by outside noise from trolleys, calling along corridors (poor venue design) and set up of next door room*
- *not all presenters were at their posters*
- *my first time at this conference and I enjoyed it a lot*
- *Well done, very enjoyable conference. Exceptional hospitality.*
- *There were some sessions that were very long (# 7) with 9 talks. If possible try to limit the session to 6/7 talks.*
- *Excellent conference that was well organised and thought-out.*
- *Perfect (as always)*
- *Clarity about conference cruise inclusion in fee was lacking. Inclusion of email addresses for delegates. Alternatives for voice amplification (e.g. dip-on-mics)*
- *Ensuring all speakers have adequate use of microphone as some presenters were difficult to hear*
- *adding a pre-conference workshop on hot topics, especially for young scientists*
- *The conference was really great, nice to have no parallel sessions and really relevant talks. The conference dinner was really great! It's a long way to travel but well worth it and I sincerely hope to come back.*
- *Consider adding a 30 minute discussion/highlights session at the end of each day to capture the most exciting trends/highlights in the days presentations/technologies*
- *Some sessions were a little long with 7 sessions and quite dense particularly the methods presentations - perhaps these presentations could be split with a break.*
- *Lightening rounds for posters. Vary talk lengths (20, 10 and lightening). Keynote could remain 45 minutes. More vegan food.*
- *It was nearly perfect!!*
